Operr Parking System

Parking Garage Business Management Platform

Can't Properly Track Payments With Pen & Paper System?

Spending Too Much Money on Garage Management Systems and Devices?

Manage All of Your Garage Operations With Just One Powerful Tool!

www.operrparking.com

Customer Website/APP (Call for Price)

We provide you with website and/or mobile app (IOS & Android) for your garage business which will enable you to take your business online and begin taking reservations, monthly user applications and promoting your parking garage business online.
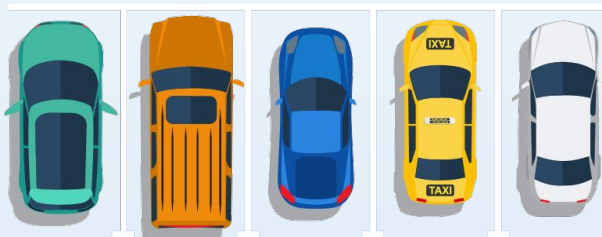

Management Platform

The web based managements platform is the centerpiece of the system. It gives the owner full control and oversight of their parking garage operations. It tracks cars, transactions, regular & monthly customers, employees and more. You can control the entire system from this easy-to-use management portal. The business owner or managers can access the information on the go, easily able to log on wherever they have internet access.

Electronic Ticketing System

Our QR code and SMS system helps simplify the parking process and allows check in/out or validate monthly user accounts with one quick scan. Our powerful system will help you digitize your parking garage operations and management. This helps reduce costs by removing the need for physical tickets and ticket handling by the parking attendants.

A Quick Case Study

"One parking garage owner heard a lot attendant whom he had hired a couple of year prior, tell everyone at work that he was buying a house in a decent part of town. The owner couldn't figure out how that was possible on an attendant salary. Upon some investigation, the owner figured out he was skimming cash off the top and coming up with ways to use the lot to make profit for himself that couldn't be easily detected by the owner for several years." - Parking Lot Owner

Business Telephone System

We can also provide your business enterprise level telephone services and phone system administration tools at amazing rates. From fully configurable multi-level touch-tone menus to adding features to your existing lines such as SMS, Voicemail and conferencing, we can help your business reduce cost more with our Operr Tel service.

A.I. Vehicle & Plate Tracking

Every car is tracked by the Operr Parking System using high-resolution I.R. cameras that can automatically detect vehicles, recognize license plates and count the incoming and leaving customer traffic. Our system then matches this data with payment data and employee data to track chain of custody and give you the oversight you need as a lot owner/operator. Usage of whitelists for vehicles on the premises helps distinguish between customers and monthly users or garage staff vehicles. We aim to let you never miss one car and one dollar payment.

We also provide a ticket printer that is connected to the system and prints tickets and receipts automatically, saving attendants precious time.

Simple Pricing Structure

Our simple pricing structure is the most affordable in the market today. We are making prices even lower! Offer is valid for the next 30 days! Call us today!

Lot Size	Old Price	New Price
Up to 60	$90	$60 week
60-120	$120	$90 week
120+	$150	$120 week
